

Visit 65 CADI Form

Instructions: This form is to be used as a paper back-up for the CADI. Fill out the responses on this form and data enter the responses into the CADI by initiating a CADI session for this MACSID. Since the date and time began and ended are automatically populated by the CADI, scan in this front page and the time ended and email to Andrea Stronski (astrons2@jhu.edu). CAMACS will update the CADI session for the MACSID with the correct dates and times. Keep a copy of each completed CADI paper form for your records.

*** = abbreviated interview questions. Administer all embedded questions within a skip pattern for abbreviated interview questions.**

Visit 65 CADI Form

What was the name and address of the physician who diagnosed the condition(s)? If more than one diagnosis, ask if same or different doctors.

Name of Hospital/clinic or doctor: _____
ADDRESS: _____
CITY: _____ STATE _____ DATE: ____ / ____ / ____
Month Day Year

Name of Hospital/clinic or doctor: _____
ADDRESS: _____
CITY: _____ STATE _____ DATE: ____ / ____ / ____
Month Day Year

Administration: These are baseline questions and will be administered one time to all participants and followed up with since your last visit question every visit going forward. **Both sets are listed below. Only complete the baseline for participants who have not been administered this section in the past. Otherwise, skip to the Bone Strength Sub Study question (T1).**

Introduction:

We are now going to ask you about heart problems that may have been diagnosed prior to age 55 among the men and prior to age 65 among the women in your immediate family. Immediate family comprises your biological father, mother, brothers and sisters.

Mark here for those participants who do not know them because they are adopted.

Interviewer note: Questions apply to all living and deceased immediate family members. If a participant's family member was diagnosed with a heart attack and later died of a heart attack before age 55 if male or age 65 if female, fill in yes for both questions for this same family member. Similarly, if diagnosed with a heart attack and had surgery, fill in yes for both questions. All events have to occur prior to age 55 for men and age 65 for women. If the participant is not sure, mark DK. If he is able to contact you after the interview with a definite answer, update the CADI with this new information

	NUMBF			NBMED		

Moving on to medications and vaccines for HIV.

Q14.1. Since your last visit, [in (MONTH, YEAR)], have you been given a **vaccine or a therapeutic vaccine HIVAC** to control HIV infection as part of a research trial?

Preventive trials study the efficacy of vaccines developed to prevent HIV infection and therapeutic vaccine trials study the efficacy of vaccines to control HIV infection by boosting the body's natural immune response and sometimes delaying the need for initiating antiretroviral drug treatment.

NO YES REF
